

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1.(Currently Amended) A method for capturing and distributing memories of a deceased individual, comprising the steps of:
providing an electronic storage memory database that can be accessed over a communication network; for displaying at least two web pages for said deceased individual, said web pages each said electronics storage memory ^{Fig 19}
~~database having a unique address for storing data accessing information with respect to said deceased individual and providing restrictive access.;~~
~~_____ said database having means for allowing selective entry of information into said database with respect to said selected individual.~~

2.(Currently Amended) A method according to claim 1 wherein each of said unique addresses comprises a URL that allows direct access to its associated web page. ^{5, 11-15} ~~means for selective access said database comprises:~~
~~_____ an information card having the address of said selected individual.~~

3.(Currently Amended) A method according to claim 2-1 wherein there is provided an information card that includes scannable data that can be scanned for allowing automatic direct access to at least one of said unique addresses for the user of said card. ~~said information card includes scannable data that can be scanned for allowing automatic access to said database for said selected individual.~~

4.(Currently Amended) A method according to claim 1 wherein information is provided to users when the deceased individual is being presented for viewing, said information advising said user on how to access directly at least one of said web pages. ~~said means for accessing said database is provided when the deceased is being presented for viewing.~~

5.(Currently Amended) A method according to claim ~~5-1~~
wherein information is provided to users at the wake or funeral of said deceased individual for allowing the users to directly access at least one of said web pages.
~~said means for accessing said database is provided when the wake or funeral of said individual is conducted.~~

6.(Currently Amended) A method according to claim ~~4-4~~
wherein said information comprises an information card that sets forth the electronic address of at least one of said web pages. ~~means for automatically accessing said database includes a web page on said electronic storage memory database having a unique URL.~~

7.(Currently Amended) A method according to claim ~~7-6~~
wherein at least one of said web pages includes a template which setting forth the manner and structure of the web page/site.

8.(Currently Amended) A method according to claim 6
wherein said web page is hosted by a business establishment having a plurality of such web pages for a plurality of different deceased individuals.

9.(Currently Amended) A method according to claim 1
wherein said ~~data~~ web page includes providing may ~~comprise~~ any one of the following: text, image, or sound.

10.(Currently Amended) A method according to claim 1
wherein said ~~information~~ web page provides ~~comprises~~ multi-media information.

11.(Currently Amended) A method according to claim 1
wherein one of said web pages is a public page and wherein at least one other of said pages comprises a private web page. ~~database has a public and private section.~~

12.(Currently Amended) A method for capturing and distributing memories of a deceased individual comprising the steps of:

providing an electronic storage database for displaying a web page
of said deceased an individual that can be accessed over a communication
network, said ~~database web page~~ having a unique address; and
~~providing means for accessing said database over said~~
~~communication network;~~
~~said database having means for allowing entry of data into said~~
~~database with respect to said individual;~~
providing an access card wherein the unique address of said web
page is provided that allows direct access to said web page. ~~pre authorization for~~
~~selected individual for accessing said database.~~

13.(Cancelled).

14.(Currently Amended) A method for capturing and
distributing memories of a deceased individual comprising the steps of:

providing an electronic storage database for displaying a web page
~~an individual containing information with respect to said deceased individual~~ that
can be accessed over a communication network, said ~~database web page~~ having a
unique address;

~~providing means for accessing said database over said~~
~~communication network;~~

said ~~web page database~~ having means for allowing entry of data
into said web page by a user ~~database~~ with respect to said deceased individual; and

providing ordering means for ordering goods and/or services with
respect to the information being displayed on the web page and a gatekeeper for
having editorial control over entry of said data.

15.(Currently Amended) A method for capturing and
distributing memories of a deceased individual comprising the steps of:

providing an electronic storage database for displaying a web page
containing information about a deceased an individual that can be accessed over a
communication network, said ~~database web page~~ having a unique address;

providing means for accessing said ~~web page database~~ over said
communication network;

~~said web page database having means for allowing entry of data into said web page database with respect to said individual; and providing ordering means for ordering goods and/or services with respect to said information being displayed on said web page. pre-approval of said information prior to being entered into said database.~~

16.(Currently Amended) A method for capturing and distributing memories of a deceased individual, comprising the steps of:
providing an electronic storage memory database for displaying a web page that can be accessed over a communication network, said electronics ~~storage memory database web page~~ having a unique electronic address; ~~and for said deceased individual;~~

~~providing means an information card for automatically accessing said database with respect to said deceased individual over said communication network, said information card having machine readable information that can be used for directly accessing said web page.~~

~~database having means for allowing entry of information into said database with respect to said selected individual.~~

17.(Cancelled).

18.(Cancelled)

19.(Currently Amended) A method according to claim 16 wherein said ~~means for information card~~ accessing said database is provided when the deceased individual is being presented for viewing.

20.(Currently Amended) A method according to claim 19 wherein said ~~means for information card for~~ accessing said database is provided at when the wake or funeral of said deceased individual is conducted.

21.(Cancelled).

22.(Currently Amended) A method according to claim ~~21~~16 wherein said web page includes a template which setting forth the manner and structure of the web page/site.

23.(Currently Amended) A method according to claim ~~21~~16 wherein said web page is hosted by a business establishment having a plurality of such web pages.

24.(Currently Amended) A method according to claim 16 wherein said web page or said electronic data base is accessed by a Kiosk .

25.(Currently Amended) A method according to claim 16 wherein said ~~electronic data base~~web page is accessed by personal computer at location remote from said electronic database.

26.(Original) A method according to claim 16 wherein said information comprises multi-media information.

27.(Currently Amended) A method according to claim 16 wherein said web page~~database~~ has a public and private section.

28.(Currently Amended) A system for capturing and distributing memories of a deceased individual, comprising:

an electronic storage memory database for displaying a web page of said deceased individual that can be accessed over a communication network, ~~said electronics storage memory database a web page~~ having a unique address; ~~and -for storing data with respect to said deceased individual, said database having means for allowing selective entry of information into said database with respect to said selected individual-~~

an access card providing said unique address for use in accessing said web image.

29.(Original) A system according to claim 28 further comprising a remote communication device for communication with said electronic storage memory data-base over said communication network.

30.(Original) A system according to claim 29 wherein said communication network comprises the internet.

31.(Original) A system according to claim 30 wherein said remote communication device comprises a personal computer.

32.(Original) A system according to claim 31 wherein said remote communication device comprises a Kiosk .

33.(Currently Amended) A system according to claim 32 wherein said Kiosk includes a reader for reading information from ~~an information storage device~~ access card for allowing ~~automatic~~ direct access to said unique address at said electronic storage memory database.

34.(Cancelled).

35.(Currently Amended) A system according to claim ~~34~~ 33 wherein said access card includes a machine readable code which provides information for said automatic access.

36.(Currently Amended) A software product such that when loaded onto a computer it would cause the computer to do the following steps:
providing pre-authorization for selected individual for accessing said database;

providing a gatekeeper for having editorial control over entry of said data by said related individuals; and

providing pre-approval of said information prior to being entered into said database.

~~37~~
B1
--37.(New) A method according to claim 15 wherein said means
for ordering goods and/or services comprises a link to a third party site that can
provide said goods and/or services.--
